PROFESSIONAL SUMMARY

PL-300 certified Data Analyst who turns raw transaction data into clear retention and churn insights. Builds end-to-end in SQL Server, Python and Power BI, from a clean data model to a decision-ready dashboard, on a data quality and validation foundation.

SKILLS

Data and BI: SQL, T-SQL, SQL Server, Power BI, DAX, Power Query, Microsoft Excel
Python: Python, Pandas, Matplotlib, Seaborn, Scikit-learn, Git, GitHub
Methods: Data cleaning, data validation, data modelling (star schema), cohort analysis, RFM segmentation, K-Means clustering, logistic regression, hypothesis testing, dashboard design, KPI reporting

PROJECTS

End-To-End Retail Retention Analysis | SQL Server, Python, Power BI
GitHub repository | Dashboard report (PDF) | Project brief (PDF) | Video walkthrough

- **Data modelling:** Modelled 1M+ transactions into a Kimball star schema in SQL Server and removed 11,812 duplicates, so the analysis rests on clean data and revenue reconciles to £19.64M.
- **SQL analysis and segmentation:** Used CTEs, window functions, PIVOT, a stored procedure, RFM, K-Means (k=4) and cohort analysis to trace where revenue comes from: repeat customers (72%) drive 97% of revenue, 42 customers hold 27%, and retention peaks at about 22% in month 2, so retention is the lever.
- **Churn and Power BI:** Built a logistic regression churn score (ROC-AUC 0.77) to find at-risk customers: 51% are inactive 90+ days, holding £3.30M of revenue. Presented it in a Power BI report (21 DAX measures) with win-back recommendations, so the business knows whom to re-engage first.

Fintech Customer Acquisition and Profitability Analysis (In Progress) | SQL Server, Excel, Power BI

- Compares 5 acquisition channels on customer acquisition cost (CAC), lifetime value (LTV), payback, return on ad spend (ROAS), attribution and credit risk (synthetic 10-table dataset, 136K rows) to recommend a budget reallocation, via SQL views, an Excel Solver optimizer and a 4-page Power BI report.

WORK EXPERIENCE

Data Entry Operator | Operators Data Entry Solutions | March 2026 - Present

- Maintain high-volume records on national platforms (Ktimatologio, e-EFKA, myAADE), ensuring data integrity, consistency and audit-readiness.
- Validate data and correct duplicate, inconsistent and incomplete records, handling confidential data under data protection policies.

MILITARY SERVICE (COMPLETED)

Hellenic Army, Special Forces: Amphibious Commando, Demolitions Specialist | Sept 2024 - May 2025

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Harvard CS50x, 2024
- English C2 (Michigan MET) | German B2 (Goethe-Zertifikat) | French B2 (DELF)

EDUCATION

BSc in Tourism Management | University of West Attica | Oct 2019 - Dec 2023
Very Good (7.48/10). Business Statistics, Financial Statements Analysis, Macroeconomics
University projects: Film Tourism in Greece (survey analysis) | Entersoft A.E. (financial analysis)
