

# Giannis Psomas

Data Analyst

psomasgiannis2001@gmail.com | Athens, Greece | [LinkedIn](#) | [GitHub](#)

## SUMMARY

Data Analyst with a background in structured data quality control and financial record reconciliation. Microsoft PL-300 certified, with end-to-end project experience in SQL Server (T-SQL), Python and Power BI, from data modelling and cleaning to dashboards. Trilingual: English (C2), German (B2) and French (B2). Focused on turning raw commercial data into actionable retention and churn insights.

## TECHNICAL SKILLS

**Data and BI:** SQL (T-SQL), SQL Server and SSMS, Power BI, DAX, Power Query, Microsoft Excel

**Python:** Python, Pandas, Matplotlib, Seaborn, Scikit-learn, Jupyter

**Methods:** Data cleaning and validation, star schema modelling, cohort analysis, RFM segmentation, K-Means clustering, logistic regression, dashboard design

**Tools:** Git and GitHub

## PROJECT EXPERIENCE

### End-To-End Retail Retention Analysis | SQL Server, Python, Power BI

[GitHub repository](#) | [Dashboard report \(PDF\)](#) | [Project brief \(PDF\)](#) | [Video walkthrough](#)

- **Data modelling:** Built a Kimball star schema in SQL Server from 1M+ raw transactions, removing 11,812 duplicate rows and resolving 83 multi-date invoices; revenue reconciles to £19.64M.
- **SQL analysis:** Answered business questions with CTEs, window functions, PIVOT and a stored procedure: repeat customers (72%) generate 97% of revenue, 63% of them reorder within 90 days, and the top 10 products make up 8% of revenue.
- **Customer analytics:** Segmented 5,852 customers with RFM and K-Means (k=4) in Python, showing that 42 customers hold 27% of revenue (£4.61M), and mapped 25 monthly cohorts, where retention peaks at about 22% in month 2 and then erodes.
- **Churn risk scoring:** Built a logistic-regression churn risk score (ROC-AUC 0.77) showing that 51% of customers have been inactive for 90+ days, holding £3.30M (17%) of historical revenue.
- **BI reporting:** Delivered a 6-page Power BI report with 21 DAX measures covering revenue, products, repeat behaviour, segments, cohorts and churn risk, with prioritised win-back recommendations.

## PROFESSIONAL EXPERIENCE

### Data Entry Operator | Operators Data Entry Solutions | March 2026 – Present

- Maintain high-volume structured records across national public platforms (Hellenic Cadastre/Ktimatologio, e-EFKA, myAADE), ensuring data integrity, consistency and audit-readiness.
- Perform quality control and validation, correcting duplicate, inconsistent and incomplete records, while handling confidential data in line with data protection and compliance policies.

### Assistant Accountant (Internship) | Altair Travel Agency S.A. / Tripair GmbH | May 2023 – September 2023

- Streamlined invoice tracking, receipt validation and record reconciliation, supporting accurate financial reporting with finance stakeholders.
- Maintained structured accounting and vendor records, verifying transactional and pricing accuracy with advanced Excel functions and keeping records audit-ready.

## CERTIFICATIONS

### Technical Certifications

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – view credential
- Harvard CS50x: Introduction to Computer Science, 2024 – view credential

### Language Certifications

- English – Certificate of Proficiency, Michigan English Test (MET), Level C2
- German – Goethe-Zertifikat B2 (Goethe-Institut)
- French – DELF B2 (Diplôme d'études en langue française)

## EDUCATION

### BSc in Tourism Management | University of West Attica | Oct 2019 – Dec 2023

Grade: Very Good (7.48/10). Coursework: Business Statistics, Mathematics of Management Science, Tourism Market Research, Case Studies in Tourism (9.4/10), Analysis of Financial Statements, Macroeconomics

- **Film Tourism in Greece (survey, n=60):** Data cleaning and validation, Fisher exact, Mann-Whitney and Spearman tests with Holm correction | Python, SPSS | [GitHub](#)
- **Entersoft A.E. (financial analysis, 2014–2017):** Rebuilt ratios from raw statements, audited the inputs against the published annual reports and corrected 5 errors | Python, Excel | [GitHub](#)

## MILITARY SERVICE (COMPLETED)

Hellenic Army, Special Forces: Amphibious Commando, Demolitions Specialist | Sept 2024 – May 2025
