Summary

Entry-level data analyst, PL-300 certified, transitioning from tourism business management, with SQL Server (T-SQL), Python, Excel and data visualization (Power BI, DAX).

Projects

Retail Retention Analysis GitHub | Case study | Video

- Found that 51% of customers had been inactive for 90+ days across 1M+ transactions in SQL Server, and confirmed spend differences with statistical tests (Mann-Whitney, bootstrap), not averages alone.
- Reconciled £20.12M of gross sales to £19.64M of net revenue via T-SQL cleaning, quality checks and Kimball star schema data modelling, so finance and marketing share one agreed figure.
- Quantified £3.30M of revenue at risk using RFM segmentation and a Python churn model, and shared the findings with non-technical readers through a Power BI dashboard (21 DAX measures), a written case study and a recorded video.

FinTech Customer Acquisition and Profitability Analysis GitHub | Case study | Video

- Determined which acquisition channels stay profitable after credit losses, drawing on a 136K-row dataset in SQL Server and Excel Solver.
- Showed that paid social customer acquisition cost is 82 EUR, not 66, once acquisition credit is shared across every click, using 10 T-SQL reporting views of CAC, LTV and default rate.
- Projected a quarterly uplift of about 40,700 EUR by cutting three channels' budgets by 50% and raising referral spend by 20%, and built a Power BI KPI scorecard, backed by a written case study, that shows which channels meet six targets.

Work History

Data Entry Operator, Operators Data Entry Solutions *March 2026 to current*

- Validated legal and public records from Ktimatologio, e-EFKA and myAADE in an in-house system, checking each entry against source records for accuracy under data protection policies (GDPR).
- Exceeded a 400-record daily target by 25-37% (500-550 per day) through data cleaning, correcting duplicate, inconsistent and incomplete entries.
- Acted on supervisor feedback within a multi-level quality review (second and third checks), with my contract renewed on successive projects.

Assistant Accountant (Internship), Altair Travel Agency / Tripair GmbH *May 2023 to Sep 2023*

- Validated about 40 to 50 invoices a week against receipts and supporting documents for the CFO and the Senior Accountant, for a travel agency's accounting records.
- Reconciled invoices and receipts to ledger entries in Excel (VLOOKUP, formulas, pivot tables) to catch mismatches.
- Maintained vendor records, verifying transaction and pricing accuracy for audit readiness.

Education & Certifications

- B.Sc. in Tourism Business Management, University of West Attica (Graduated 2023)
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) (view here)
- Harvard CS50x (view here)

Skills

- Data and BI: T-SQL, SQL Server, Power BI (DAX, Power Query), Excel (VLOOKUP, pivot tables, Solver), Python (Pandas, Scikit-learn), Git and GitHub
- Languages: English C2 (Michigan MET), German B2 (Goethe-Zertifikat), French B2 (DELF)
